The Instant Traffic and weather reports on XM Satellite Radio is on of the best services out there to the business consumer. No matter what time of day I am traveling into the city I can get an instant traffic and weather report instead of the traditional rush hour reports located on local FM channels. I also find it very easy for me to get local traffic reports for foreign metro areas where I am traveling to and in when I have no clue of where to find the local traffic on area stations. Please do not take away this amazing service of XM.
